

Consider the following

```
cur.execute("select * from employee")
```

cur-->

ENO	ENAME	SAL	CNAME
30	anil	15.6	Siemens
40	ganesh	12.4	PSF
60	satyabrata	11.2	MS
50	prasant	2	wipro
70	srinu	7.8	IBM
80	Hari	4.5	Amazon

To get the records from cur object, we have 3 functions in cursor object. They are.

1. fetchone()
2. fetchmany(no. of records)
3. fetchall()
